INTRO A. Hello, this is _____ calling for Rutgers University.

You participated in the Rutgers Family Health Study telephone interview in {Month, Year Wave 1 survey} asking you health-related questions about yourself and a randomly selected child in your household. This child that you answered questions about in the phone interview was:

- > Name/initials: **(ChildName)**
- > Gender: **(ChildGender)**
- > Current age: **(ChildAge)**

We are inviting you to participate in a follow-up study, called the *New Jersey Child Health Study*, which is sponsored by the National Institutes of Health and conducted jointly by the Rutgers University Center for State Health Policy and the ASU School of Nutrition and Health Promotion. Results from the project will be used to shape policies and programs that aim to improve the health of children in your community and the nation.

As in the previous interview, if you qualify for participation, we will ask about your family's health and your neighborhood. This survey takes about 30 minutes, and to thank you, we will send you a check for \$50 after we finish the survey. In addition, you will be invited to participate in a follow up study that we will describe at the end of the survey for which you will receive an additional \$15. There will also be another opportunity to participate in an in-home part of the study for which you will get an additional incentive for \$50.

Participation in the study is voluntary and confidential and you may withdraw at any time. No individuals will be identified in any reports using the data. Only information for groups of people will be reported.
